PROFESSIONAL SUMMARY

Electronics and Communication Engineering graduate with a strong interest in Java Backend Development and hands-on experience in developing software applications using Java, SQL, JDBC, Spring Boot, REST APIs, MySQL, and Git. Skilled in object-oriented programming, database management, and backend application development through academic and personal projects. Seeking an entry-level Java Backend Developer opportunity to apply technical expertise and contribute to the development of scalable and efficient software solutions.

TECHNICAL SKILLS

Languages: Java

Technologies: Spring Boot, REST APIs, JDBC, Spring Data JPA, Hibernate, MySQL

Tools: Maven, Git, GitHub, Postman, IntelliJ IDEA, MySQL Workbench, OOP's, Collection Framework, Exception Handling

Web: HTML, CSS

PROJECTS

Inventory Management System

GitHub Repository: [nventory-management-system](#)

Tech Stack: Java, Spring Boot, Spring Data JPA, Hibernate, MySQL, Maven, Postman, Git

- Developed a RESTful Inventory Management System using Spring Boot, Spring Data JPA, Hibernate, and MySQL to manage product records and inventory operations.
- Implemented CRUD functionalities through REST APIs following a layered architecture with Controller, Service, Repository, and Entity components.
- Applied validation, custom exception handling, global exception handling, and tested API endpoints using Postman for reliable backend operations.

Bike Rental Management System

Repository Link: [bike-rental-management-system](#)

Tech Stack: Java, MVC Architecture, Collections Framework, OOP, Exception Handling, Git

- Developed a console-based Bike Rental Management System using Java and MVC architecture to manage bike rental operations.
- Implemented functionalities such as adding bikes, renting bikes, returning bikes, searching bikes, and managing customer records.
- Applied object-oriented programming principles, collections framework, and exception handling to build a modular and maintainable application.

Crizus Anarok Defender (Safety Jacket System)

- Developed a safety jacket prototype with an auto-inflatable mechanism for emergency situations.

Hazarder Buzzer System

- Developed a sensor-based hazard detection system with buzzer-based safety alerts.

IoT Based Smart Waste Management System

- Designed and implemented an IoT-based Smart Waste Management System using sensors to track garbage levels and optimize waste collection processes.

EDUCATION

B.E. ELECTRONICS AND COMMUNICATION: Panimalar Engineering College | 2022 – 2026 | **7.44 CGPA**

HSC: Petit Seminaire Higher Secondary School | 2021 – 2022 | **73%**

SSLC: Petit Seminaire Higher Secondary School | 2019 – 2020 | **61.1%**

CERTIFICATIONS

- Basics of Java
- Object-Oriented Programming in Java

ACHIEVEMENT

- Runner-Up in Inter-College Project Expo for Crizus Anarok Defender.
